Other

Auto Refresh View

You can instruct WebFront to auto refresh views every minute, this can be very useful when you need to monitor a certain view for incoming work items.

<input type="checkbox"/>	Open any work item- or configuration item view in WebFront
<input type="checkbox"/>	Right click the view and select Start auto refresh NOTE: The next time you change view WebFront will automatically stop the auto refresh cycle. If you want to stop it without having to change view, just right click the view and select Stop auto refresh .
