Content	New Features
	Corrections
	Known Limitations

WebFront for Service Manager

WebFront for Service Manager is a web console used for managing your daily work in Microsoft System Center Service Manager™. It enables common tasks usually only accessible by using the System Center Service Manager console to be accessible via a web browser.

> Important: If you are installing or upgrading WebFront in a Service Manager 2012 environment, please make sure you use a version that is lower than 3.0. If you are on Service Manager 2016 or later, please make sure you use an installer with a higher version number than 3.0. If you have any questions, please contact support@gridprosoftware.com.

New Features

No features have been added in this version.

Corrections

The following defects have been corrected in this version.

- Signing certificate has been updated. Please export and update the certificate in your environment if you have elevated permissions configured. See product documentation for instructions.

Known Limitations

No limitations have been identified in this version.
