- ∞ Extensions
- ∞ ITSM Capabilities
- ∞ Microsoft Azure Stack Integrated

When organizations transition to the cloud, keeping business standards, cost control, and release processes is essential for IT to be able to provide innovation without compromising reliability.

Gridpro is a Microsoft Certified Partner and Enterprise Cloud Alliance Member. We help organizations take control of how workloads are provisioned and managed in Microsoft Clouds by enforcing business control and standardization.

Boost Microsoft Azure Stack with request automation capabilities

Challenges

Are you experiencing these challenges in your organization?

"Fewer people managing a growing number of services"

"Processes needing automation"

"Users having to access multiple portals for daily tasks"

"Needing seamless integration with your ITSM solution"

If the answer is yes, you should definitely take a closer look at EvOps for Azure Stack!

Benefits

Request Automation – Integrated request automation for Microsoft Azure Stack

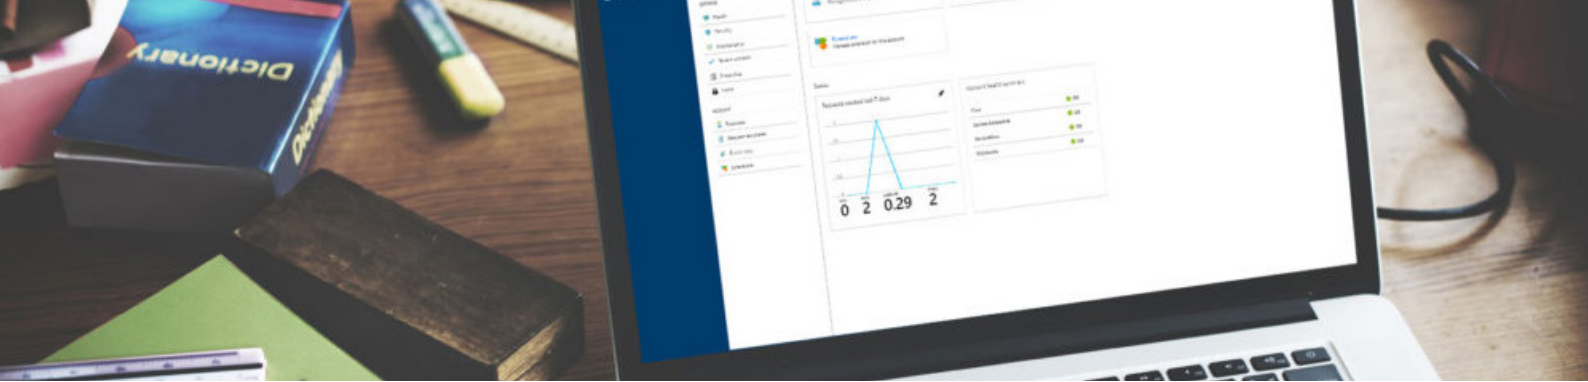

Standardization – Provision and manage workloads with business standardization governance

Cost Control – Prevent expensive workloads from being provisioned due to lack of business guidance

Predefined Processes – Avoid unexpected service downtime with predefined change and release processes

IT Service Management – Integration with leading ITSM tools like System Center Service Manager, and ServiceNow

3rd-Party Integration – Extension integration with third party solutions including Office 365, Twilio, and others

System Requirements

Integrated Systems

- Cisco
- Dell EMC
- Hewlett Packard Enterprise
- Lenovo

EvOps Integrations

- System Center Service Manager
- ServiceNow
- Custom Webhooks
- Office 365
- Service Management Automation (SMA)

Note: See our website for current available integrations, more will be added continuously.
