Release History

Product	SMA for Service Manager
Current Version	1.1.6135 (SCSM 2012 versions) 2.0.6135 (SCSM 2016 & later)
Release Date	2016-11-09

SMA for Service Manager

Service Management Automation (SMA) for Service Manager makes it possible to integrate the Service Management Automation workflow engine with Microsoft System Center Service Manager™. The integration works similar as the out of the box integration between Orchestrator and Service Manager.

1.1.6135 & 2.0.6135 (2016-11-09)

- NEW – Support added for Windows Server 2016

1.1.6053 & 2.0.6052 (2016-08-18)

- NEW - The SMA Connector now supports Service Management Automation 2016 (confirmed with Technical Preview 5)
- FIX - Schema changes in Service Management Automation 2016 caused validation failures in the connector

1.1.5990 (2016-06-01)

- FIX - Avoiding a race condition when the SMA Connector and the Orchestrator Connector were both running (enabled) in an environment. The race condition could result in that SMA Runbook Activities where marked as failed even though they were actually completed.

1.1.5382 (2014-09-01)

- NEW - We are proud to announce the general availability of our Service Management Automation (SMA) connector for System Center Service Manager. We truly believe that this connector will simplify the Hybrid Cloud stories out there and make the transition less complex.
